INTERNAL REVENUE REPORT

CATHOLIC MISSIONS IN CALIFORNIA

Appointed to Look into the Fort Sugg Case Particularly - Appoint

Commissioner Pratt's Annual Report-The Commissioner of Internal Revenue has completed his annual report, and it is now ready for the printer. The report is the most volumi-nous, as well as the most interesting, that has ever been issued from the internal revenue office. ever been issued from the internal revenue office. It shows the receipt from each specific source of revenue, and the amounts refunded in each collection district. State and Territory of the United States for the fiscal year ending June 33, 1875; also showing the number and value of revenue stamps ordered monthly by the Commissioner, the receipts from the sale of stamps, and the commissions allowed thereoe; also the number and value of stamps and the commissions thereon, the number and value of stamps for special tares, to-bacco, cigars, snuff and distribution produced from various sources in the United States for the fiscal years from those ending June 30, 1884, to June 30, 1875, inclusive; the aggregate receipts for the fiscal years ending June 30, 1863, to 1875, inclusive; the aggregate receipts for the fiscal years ending June 30, 1853, to 1875, inclusive; the total collections from each

SPECIFIC SOURCE taxes during the last fiscal year, and abstract of saisures for the year.

The report contains a complete history of our internal revenue system, and compares it with the British excise system, showing that the revenue collected from excise in the United Kingdom during the year ended March 31, 1875, expressed in pounds sterling and in United States money—the value of the pound sterling being \$4.85%—was \$132.632,233.28, with the amount of stamps being \$51,230,623.18, and the Commissioner says it may be some connelation to know that, grisevous as are our burdens laid upon such of our population of forty-two millions or more as consume the articles taxed by our internal revenue laws, the British public, numbering less by one fourth than our people, paid under their excise laws during the year ending March 31, 1875, taxes

of the United States to the amount of \$153,962,756,56 against \$110,312,154,23 paid in currency by
the people of this country during the fiscal year
which ended June 30, 1875. This comparison, fif it
do not reconcile such as find fault with our system do not reconcile such as find fault with our system as oppressive and vexatious, should modify their complaints, since it is apparent that a given number of taxes from some source must, under all circumstances, be raised to deiray the necessary expenses of the Government to discharge obligations and maintain the public credit. At best it is but a choice of means, and all reasonable men will agree that laying taxation on articles of luxury should be preferred to articles of necessity, and that the tax should be placed upon the product in the hands of the manufacturer or producer, so that, as in the case of customs duties, it is left matter of choice who shall

BEIMBURSE THE MANUPACTURER
or importer the taxes he has paid. The report
shows that the actual amount of receipts into
the Treasury from all sources from and after June
70, 1874, inclusive, of loans and Treasury notes was
as follows: Customs, 61,673,710,267,91; internal revenue. 81,906,023,728.59; direct tax, \$4,830,189,37;
public lands, \$22,151,085 92; miscellaneous, \$236084,987,84; premium on loans and sales of goldcoin,
\$192,687,117,46; total, \$4,200,638,341. Commencing
with the year 1886, there has been a continuous repeal going on yoar by year of such internal taxes
as were most oppressive, or at least as gave rise
to most complaint, until at present but few subjects of taxation romain. The taxes are now
levied upon distilled spirits fermented liquors,
manufactured tobacco, snuff and cigars, upon
which articles the collections for the pear ended
June 30, 1875, were \$10,545,154 23; the collections
for the former rear having, been, in consequence
of the duties repealed from

YEAR TO YEAR, YEAR TO YEAR,
less than any single year since the system went
into operation, except the first, (1563,) when the
collections were \$41,003,102,90. The increase during the last fiscal year is owing in part to the incroase of duties laid by the act of March 3, 1875,
upon distilled spirits, manufactured tobacco,
cigars and cigarettes, and in part to the taxes collected under laws repealed, extraordinary efforts
having been put forth by the Internal Revenue
office to collect the

DELINQUENT TAXES

and successions.

A statement is given showing the receipts under the act of March 3, 1878, up to and inclusive of June 30, 1878, from the different artisles subject to an increased tax, which were distilled spirits, cigars, eigarcites and manufactured tobacco, showing a total tax returned of \$4,285,1855. The tax returned upon distilled spirits was \$1,779,799.85, and the Commissioner says regarding it, it will doubtiess be a matter of surprise that the

is also made showing the net amount of receipts from all sources of internal revenue during the last fiscal year, showing that New York paid \$15,200,989.54; Massachusetts, \$6,500,490,115; Missouri, \$4,550,456.77; Ohio, \$14,656,286.30; Rhode laind, \$221,767.50; District of Columbia, \$111,-627.97; California, \$2,985,196,304 Maryland, \$2,765,844.80. A statement also appears showing the number of distilleries registered and operated during the fiscal year ended June 30, 1875, showing the number operated 4,008. Great space is devoted to the whisky frauds—how they have been committed, the precautions taken against their recurrence, and additional legislation recommended. In the latter instance the Commissioner gives his opinion that the only law necessary is one that shall make the requirements as stringent and the penalties for

PORCE OF REVINUE ACRES.

Is entirely inadequate to perform the duties of templated by law, and therefore he carned recommends that Congress be requested to theirse, by law, the employment and payment fifteen agents, in addition to the present number of the heavy of the person of the confident that the councan be so thoroughly policed as to prevent uperpetration of fraud and grastly increase trevenue. Since the report of the Commissione predecessor, (Mr. Douglass.) thirteen collect districts have been abolished; that is, considered with these at present existing, thereby ing to the Government an annual expense about \$40,000. He is convinced that further excitation can be made, thereby greatly reduce expenses without injuriously affecting the election of the reresure.

EXPENSENCE HAS DEVELOPED the necessity of some changes in the laterns revenue laws, which the Commissioner states a follows: First. As to forfeiture of distillerie The present law provides that when a judgmen of forfeiture in any case of seisure is recovere against any distillery having a registered productor exactive of less than one hundred at of forfeiture in any case of seisure is recovered against any distillery having a registered producing capacity of less than one hundred are fitty gallons a day because no bond has been given, every still, doubler, worm, &c., therein shall be so destroyed as to prevent the use of the same, or any part thereof, for the purpose of distilling, and the material shall be sold, as in case of other forfeited property. This contemplates a judgment of forfeiture.

In the mountainous districts of several of the Southern States a great deal of illicit distilling of spirits in remote and out-of-the-way localities is carried on to the great detriment of the revenue. The distilling apparatus is of a simple and inexpensive nature, easily removed, and when broken up is of little or no value.

United States and Mexican Commission.

United States and Mexican Commission. Sir Edward Thornton, the umpire in the United States and Mexican Claims Commission, yesterday rendered his decision in the case of Thadeus Amat, hishop of Monterey, and Joseph Allemany, archbishop of San Francisco, vs. Mexico, popularly known as the "Pious Fund Case."

archishop of San Francisco, vs. Mexico, popularly known as the "Pious Fund Casa."

The "Pious Fund" of the Californians was the result of donations made by various private persons for the purpose of establishing, supporting and maintaining Reman Catholic missions in California, and for converting to that faith the heathen of that region. The formation of the fund dates back to 1755, and the original donations were made to the "Society of Jesue" for the purpose above indicated.

On the Esta of February, 1842, Santa Anna, then Provisional President of Mexico, issued a decree that the real and other property belonging to the fund should be incorporated into the National Treasury, and engaging that the Government should forever pay to the beneficiaries interest at the rate of 6 per cont, per annum on the proceeds of the sale of the properties.

The obligations have not been met, although frequent demands for payment have been made. Claimant, as the lawful successors of the original trustees, so far as concern the territory of Upper California, here demand against Maxico a chare of each annual installment of interest accruing since February 2, 1848, (beyond which date the jurisdiction of the commission does not extend, and which was the date of the acquisition of California by the United States, proportioned to the population of Upper California, with interest upon each annual installment from the date of which it fell due.

The unpure decides that it is equitable to divide the gross revenues of the fund since February 2, 1845, (into two parts, one of which these claimants are entitled to, and rejects the demand. He, therefore, awards that there be paid by the Mexican Government, on account of the above-mentioned claim, the sum of \$694,700.79 in Mexican gold dollars, without interest.

Panis, Nov. II.—The lobbles, floor and galleries of the Assembly were crowded to-day, and great excitement was manifested over the debate on the electoral bill.

M. Ricard, a moderate Republican, opened the discussion. He stigmatized the voting by arrondissement as an attack on universal suffrage. He declared that M. Buffet, having endeavored to retain the prefects of the Empire, now because he repudiates the majority which voted the constitution of February 25, wishes to re-establish the electoral system of the Empire.

We demand, continued the Deputy, the scruten de liste, which will preserve the alliance formed on the 25th of February.

M. Duhaure, Minister of Justice, replied, saying "the Government will not accept at the next

suffrage."
A vote was then taken by means of the secret ballot, and resulted in favor of the Government-standing 357 years to 250 nays. The Government did not make the matter a Cabinet question.

The Note of the Vatican-Lendon, Nov. 11.—The note of the Vatican, in embarraes the new Spanish Government; it particularly wishes to assist it, but only by such means as would be truly efficacious, and which would not permit the rupture of that sacred tie which has always been the glory of Spain. Religious unity, which it is now sought to banish, cannot impede the development of civilization, but is, on the contrary, its true beacon. It is the duty of the Papacy to combat not civilization, which is brought forward merely as a pretext, but the cerruption invading the hearts of nations. In persisting upon the ground asserted, the Papacy believes it renders great service not only to the Spanish Government but to all Spain. The conduct of the Papacy Invasion and of the Vatican must be regarded from this point of view, but if Spain, moved by supreme necessity, wishing to draw up an understanding on the same principles, tenders another form, the Papacy is open-to-negotiation with the object of introducing acceptable modification into the concordat, after each one has declared its views, if it is to be seen how far the Vatican can accept the declaration of the Spanish Government that it is desirous of coming to an understanding, and states that instructions to negotiate have been given the Nucleo at Madrid.

Last night Miss Phillipps repeated to a large and fashionable audience the opera of "La Favor-ita," and the triumphs, too, of its first represen-tation. To-night, Rossini's opera of "Cenerentola" will introduce for the first time in America. Miss Matilda Phillipps, the only sister of Miss Phil-lipps. She has been in Italy for several years, studying music under the best masters, and her eputation there is most excellent. When Miss Adelaide Philipps was only fourteen years of age she made her debut as an opera singer in the same role her sister makes her American

ston exists in regard to this opera the plot is appended:
The fairy story of Cinderella, on which the plot of this opera is founded, is a very acciontone, being an imitation of the old Greek tale of "Rhodopis," whose sandal was carried off by an eagle, and dropped into the bosom of King Psammation, as he was sitting on his throne in Memphis-Rhodopis, according to Ovid, was a fellow-servant with Arop. Cinderella first appeared in printed form in 1807, in Italy, and has been rewritten and reprinted a number of times. In the story of the present werk the "fairy" portions of the tale are omitted, Alidore taking the place of the fairy "god-mother." The pompous but poor Baron Don Magnifico had two daughters, of like spirit with their father, and besides these, a daughter-
